## Ventilate

- Homes are being built tighter with fewer envelope leaks
- Helps to control moisture in the air
- For indoor air to remain healthy, outdoor air should be utilized

**FGBC** FLORIDA GREEN BUILDING COALITION A GREEN FLORIDA FOR A BLUE PLANET

---

---

---

---

---

---

---

---

## Why Ventilate

**To Remove pollutants**

- People and pets
  - Carbon Dioxide, Water Vapor, Body Odor
- Building Pollutants
  - VOC's, combustion gasses, radon, water vapor
- Activity pollutants
  - VOC's, water vapor, odors

**FGBC** FLORIDA GREEN BUILDING COALITION A GREEN FLORIDA FOR A BLUE PLANET

---

---

---

---

---

---

---

---

## Exhaust Ventilation

- Located near pollutant
  - Remove moisture and odors
- Bath fans
  - Timer/humidistat controls
  - > 50 CFM < 1 sone
  - Energy Star
- Kitchen range hood
  - Vented to outdoors
- Dryer vents
- All of these create negative pressure in home

**FGBC** FLORIDA GREEN BUILDING COALITION A GREEN FLORIDA FOR A BLUE PLANET

---

---

---

---

---

---

---

---

## Supply Ventilation

- Outside air intake into the HVAC return duct
  - Mechanical damper closes when air handler isn't running
  - Damper can be closed if outside air is polluted
  - Keep intake 10' from exhaust vents, 2' from roof or ground

---

---

---

---

---

---

---

---

---

---

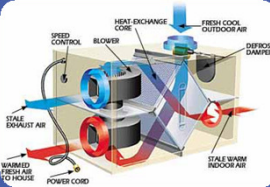

## Balanced Ventilation

### Energy Recovery Ventilators

- Condition Air for both temperature and humidity
- Suitable for hot humid locations

### Heat Recovery Ventilators

- Same as ERV but only condition for temperature
- Most suitable for dry cold locations

## Ventilation Rate

## Filtrate

- Filters remove contaminants from the air
- The **higher** the **MERV** rating the **smaller the particles** it can filter

**FGBC** FLORIDA GREEN BUILDING COALITION A GREEN FLORIDA FOR A BLUE PLANET

---

---

---

---

---

---

---

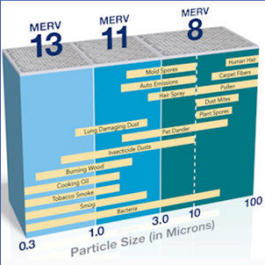

---

---

---

## Filtrate

**M** – Minimum  
**E** – Efficiency  
**R** – Reporting  
**V** – Value

**FGBC** FLORIDA GREEN BUILDING COALITION A GREEN FLORIDA FOR A BLUE PLANET

---

---

---

---

---

---

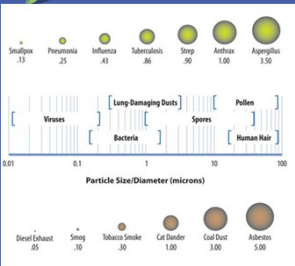

---

---

---

---

## Particle Sizes

- **MERV 4**  
– 3-10 micron < 20%
- **MERV 8**  
– 3-10 micron 85%
- **MERV 10**  
– 1-3 micron 65%
- **MERV 12**  
– 1-3 microns 90%

**FGBC** FLORIDA GREEN BUILDING COALITION A GREEN FLORIDA FOR A BLUE PLANET

---

---

---

---

---

---

---

---

---

---

## HEPA Filters

- **HEPA - High Efficiency Particulate Air filters**
- Removes micron-sized particles
- Real world installations do not always achieve performance limits measured in laboratories.

**FGBC** FLORIDA GREEN BUILDING COALITION A GREEN FLORIDA FOR A BLUE PLANET

---

---

---

---

---

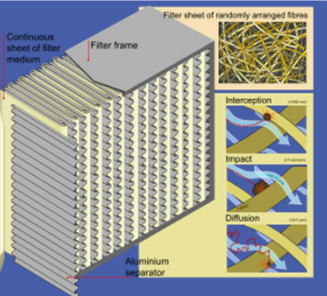

---

---

---

## HEPA Filters

- **Consist of fine fibers**
- **Alter the airflow streamlines**
  - Airflow slips around the fiber.
  - Particulate matter cannot change direction so rapidly so they impact the fiber.
  - Most particulates will not re-enter in the airstream.

**FGBC** FLORIDA GREEN BUILDING COALITION A GREEN FLORIDA FOR A BLUE PLANET

---

---

---

---

---

---

---

---

## Electrostatic Air Cleaners

### Electrostatic Precipitators

- **Use electrostatic attraction to trap charged particles:**
  - They draw air through an ionization section.
  - Particles obtain an electrical charge.
  - The charged particles then accumulate on a series of flat plates, called a collector, that is oppositely charged.

### Ion Generators

- **Also called ionizers:**
  - They disperse charged ions into the air.
  - Ions attach to airborne particles.
  - Charged particles attach and settle faster.

**FGBC** FLORIDA GREEN BUILDING COALITION A GREEN FLORIDA FOR A BLUE PLANET

---

---

---

---

---

---

---

---

## Ultraviolet

- Use UV light technology to destroy pollutants
- Air must be exposed for a minimum amount of time.
  - If too quickly, then the effectiveness is reduced.
- Three types:
  - Ultraviolet germicidal irradiation (UVGI) cleaners
  - Photo catalytic oxidation (PCO) cleaners
  - Ozone generators

---

---

---

---

---

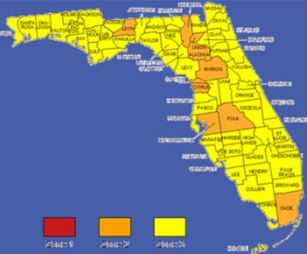

---

## Radon Reduction Techniques

- Radon is a colorless odorless radioactive gas
- Present in almost all soils and rocks
- Concentrations vary greatly
- Lung cancer can result from long term exposure at low to medium concentrations

---

---

---

---

---

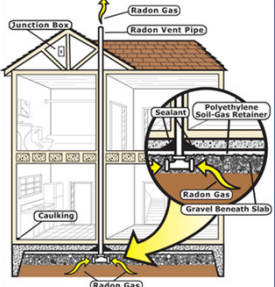

---

  - 6 mil lapped and taped
  - Taped to penetrations

FGBC FLORIDA GREEN BUILDING COALITION A GREEN FLORIDA FOR A BLUE PLANET

---

---

---

---

---

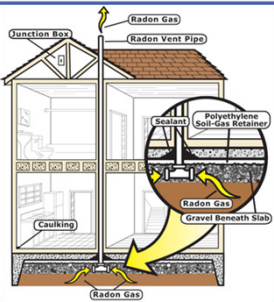

---

---

---

### Radon Resistant Construction

- Vertical Vent Pipe to the "T"
  - 3" or 4" dia
  - 12" above roof
  - 10' from any opening
- Seal slab construction joints and penetrations
  - Elastomeric sealer
  - Polyurethane caulk
